

Jaleed Ahmad

AI/ML Engineer

📍 Faisalabad, Pakistan | 📞 +92 321 1600345 | ✉ Email | 🔗 LinkedIn | 🐙 GitHub | 🌐 Portfolio | ⚙ Credly

Summary

AI/ML Engineer specializing in Generative AI, agentic pipelines, and MLOps. Proven track record of building end-to-end intelligent systems — from fine-tuning neural networks to architecting scalable multi-agent LLM pipelines on AWS and GCP.

Skills

AI/ML & GenAI: Python, PyTorch, TensorFlow, Transformers, LangChain, Langgraph, Gemini API, Vertex AI, Groq, Ollama, Stable Diffusion, ChromaDB, RAG Pipelines, LLM APIs, Embeddings, MCP (Model Context Protocol), FastMCP

Full-Stack: FastAPI, Next.js, React, Streamlit

MLOps & Cloud: Docker, Kubernetes, AWS (ECS Fargate, ECR, EC2, S3, Lambda, DynamoDB), GCP (Cloud Run, Compute Engine), GitHub Actions, Jenkins, Linux

Work Experience

Trainee AI/ML & DevOps Engineer | T8 Launchpad (NASTP Delta) – Lahore 02/2026 – Present

- Configured and maintained Linux-based deployment infrastructure using AWS ECS Fargate and Docker to support AI/ML and Computer Vision applications.
- Developed and optimized RAG pipelines utilizing LLMs to enhance context-aware enterprise workflows.
- Orchestrated automated CI/CD pipelines via GitHub Actions and Jenkins for continuous delivery of intelligent applications.

NLP Intern | Elevvo

09/2025 – 10/2025

- Fine-tuned NLP models across six text-processing projects using NLTK, spaCy, and Hugging Face Transformers.

Projects

Neural Forensics V6.0 | 🐙 GitHub | 🔗 Live | *Next.js, FastAPI, Gemini Vision API*

- Built an agentic forensic suite with an 8-stage automated inspection pipeline and dual-track reasoning engine to detect AI-generated, manipulated, and enhanced imagery.
- Implemented interactive forensic sliders for visual evidence inspection and high-confidence verdict generation with structured PDF evidence export.
- Deployed full-stack application with a Next.js frontend on Vercel and a FastAPI backend on Hugging Face, running entirely on free-tier infrastructure.

AI Study Notes Agent | 🐙 GitHub | 🔗 Live | *Python, Gemini 2.5 Flash, RAG, ChromaDB, Supabase*

- Architected a multi-user cloud-native study assistant leveraging Gemini 2.5 Flash and Search Grounding APIs for real-time, context-aware document analysis.
- Engineered a RAG pipeline using LangChain and ChromaDB (gemini-embedding-001) for persistent semantic search and accurate citations across large textbook libraries.
- Integrated Supabase for OAuth 2.0 authentication and persistent chat session management, and automated Anki flashcard generation from AI-produced notes.

TrafficGuard AI | 🐙 GitHub | 🔗 Live | *React, FastAPI, GCP Cloud Run, Gemini API*

- Built an AI-driven urban crisis intelligence platform at a hackathon that detects and analyzes severe flash floods and traffic blockages in Pakistani cities.
- Designed and deployed a React frontend and FastAPI backend on GCP Cloud Run, enabling real-time disruption simulation and mitigation recommendations powered by Gemini.

AuraBeat | 🐙 GitHub | 🔗 Live | *Node.js, Gemini API, Open-Meteo*

- Built an AI music curation platform that fuses real-time mood input, live weather data, and geolocation into an LLM context window for personalized soundscape recommendations via YouTube.

- Implemented dynamic UI aesthetic injection, BPM/energy controls, mood history sidebar, and Last.fm integration for enhanced music discovery.

ASL Recognition using Deep Learning | *Python, PyTorch, Jetson Nano*

- Designed a real-time sign language recognition system using five MPU6050 sensors to capture complex hand and finger motion data with signal preprocessing and feature extraction.
- Implemented classification using custom LSTM and CNN architectures, and deployed the trained model on a Jetson Nano for low-latency edge inference.

Education

BS Electrical Engineering, Namal University, Mianwali

Certificates

- Google Cloud: Engineer AI Agents with ADK (2026)
- Google Cloud: Develop GenAI Apps with Gemini and Streamlit (2026)
- Google Cloud: Prompt Design in Vertex AI (2026)
- Google Cloud: Explore Generative AI with Vertex AI API (2026)
- Google Cloud: Infrastructure Modernization (2026)
- Oracle Cloud Infrastructure AI Foundations Associate (2025)
- LangChain for LLM Application Development (2025)
- Understanding and Applying Text Embeddings (2025)
- ChatGPT Prompt Engineering for Developers (2025)
- Getting Started with Mistral (2025)
